

Say NO To Tiny Paychecks!

Say YES to FREE Daily Income!

You do NOT need to PAY ANYTHING to earn good money online!

I thought I was going to spend my retirement years on the wrong end of a spatula for a while and that was NOT my idea of a good time! Look around the Fast Food joints and see how many seniors are stuck doing that today while I travel around the country on FREE MONEY.

I learned about Compound Interest and Commissions that even newbies can make extra money from (with ZERO RISK), so now I just help others get the cash flow they need to turn things around for both of us FAST.

I started working on this concept in December of 2008 and made money my FIRST WEEK and have made more every week since then. By helping mostly people that have never made more than a few pennies online, those that get past the initial small earnings quickly grasp the full effect of the power of compound interest and watch it go to work growing their future. All it takes is a little patience and a few minutes a day to keep it alive.

My first big success was **Ad-Ventures4u** and at the time I first wrote this report, I was earning over \$6,000 a month that I had grown from \$260 in money I earned clicking on ads for a penny or two each and the leverage added by getting others to help me. I NEVER took a cent from our family budget, it all came from the Internet. I don't tell you this to brag, just to point out that I really do have something to teach you.

Ad-Ventures4u changed policies and is no longer an option for you, but I learned that if I applied the same concepts I learned there, they worked just the same with other programs. They are truly UNIVERSAL! Once you know how, you just wash, rinse and repeat!

Sure it would be sweet if everyone had \$10,000 they could withdraw from savings and start earning good money from day one, but I know that's not feasible for most people and would be much too risky even if they could. That's why I set up free feeder plans to make it self-funding, the same way I started. There is never any risk to your home budget this way.

The easiest way is to allow yourself to be advertised to and Get Paid For It!

The first plan I am going to lay out here is for people who live in the United States and can get a free [AlertPay](#) account to use for transferring money online. Don't worry, I have used them for years and it's safe, especially since we never put our own personal money in there.

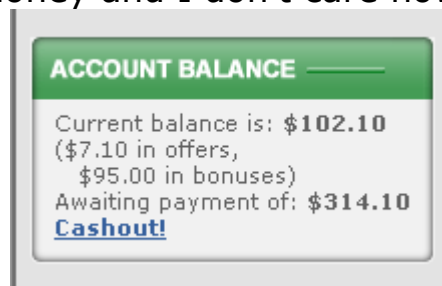

Start by getting a free account with [Fusioncash.net](#), a free sponsored offer program that works perfect for this plan. They have offers and bribes to entice us to try new products and services, but the real money is in getting referrals **EVEN IF YOU NEVER HAVE BEEN ABLE TO BEFORE!**

They pay a nice \$3 bonus for every new person you get that validates their email address and then completes at least one sponsored offer. **If you still don't think you can get referrals, you can earn anyway, just slower.**

I have been using this as a feeder program since December 2007 and they pay as agreed every time. You need to have \$25 in earnings with at least \$15 of that from completing offers in order to cashout, but if you're not in a big hurry that 's very easy to do. I use free offers that do NOT require a credit card and even though the one I use most only earns me 15 cents, you can earn it daily and add it to the easy bonus dollars you can earn.

The bonuses keep adding up as I slowly collect the \$15 in offers I need to cashout, which is just fine with me. When I do get paid, I just put it in my Genius Funds and keep earning more every week like a big giant snowball rolling downhill. It's Amazing to watch!

As an example, on 10-16-09 I requested a cashout of \$314.10 with another \$102.10 already in the pot for next time! Once that pipeline is filled, it just keeps spitting out free money and I don't care how soon, just that it does.

You just need to give a report like this away with your links in it and I show you how to do that too. Last night I even had a telemarketer that called to pitch me, but ended up promising to visit my website. There are people all over the place that need more money in this struggling economy!

Well that's my basic story, now you get to decide. Are you willing to risk the time (no money) to make it all work for you? Of course if you have a spare \$150 lying around, you can skip the feeder plan and start earning enough to talk about with West Finance, then get referrals by telling your own success story. Remember, people want to hear how you did it, not just see the links or pitches everyone uses.

Believe me, I meet new people every day that have been desperately searching for exactly what we have here, sometimes for YEARS. When they truly comprehend it, you can't hold them back from getting involved. Then like I enjoy all the time, they will be calling YOU all excited every time they get paid more free money. That's the most fun I have by far.

Look around on my YouTube Channel and you will see everything I do now is focused like a laser beam on making free money. I think it's great fun!

West Finance can be found here:

<http://www.west-finance.com/?1793>

All it takes is about 10 minutes a day while you are checking your email on the side. It truly is that easy and there is no risk but a little time.

I want to say right now that I bend over backward to help my referrals, but don't expect me to do it all for you. This has truly been the key to the vault for me and that's why I think it's the best shot you have to get to this level too. I have seen all the rest and using free money is the best!
